Al Matar, Jazan, Saudi Arabia

PUBLIC HEALTH SPECIALIST: EPIDEMIOLOGIST SCHS:21352648

I worked as a supervisor for the infection control department at the facility, in which I created new work models such as the daily vaccination follow-up model, the inspection tour model within the facility, the medical waste model, and the health practitioner training model. She supervised the training of employees in new health systems such as Raqem and Hisn Plus.

EXPERIENCE

Qout Co.

November 2023 - Present

Data Mangement

Demonstrated exceptional leadership by through my development and supervision of three work systems, which led to a 90% reduction in errors.

Accomplishments:

- Create a system using Excel to unify the company's branches
- Creating a system using Excel for the company's clients to track their data confidentially
- Create a system and link it online to follow up on daily activities and identify errors and fix them.

Primary health care

JAN 2023- July 2023

Supervisor to Infection Control Department

Drove the facility to remarkable achievements by equipping and training the facility's workers to visit and evaluate the CBAHI Center

Accomplishments:

- Passing the CBAHI assessment and accreditation with %93
- Create new work models such as the daily vaccination follow-up form, health facility tour form the medical waste form, and the health practitioner training form.
- Training workers on new health systems such as Raqem and HISN Plus.
